

Amendments to the Specification

Please replace the first paragraph at page 8 with the following rewritten paragraph:

Application tier 20a 28a, presentation tier 20b 28b, and data tier 20c 28c may be include one or more computers, and the servers (and similarly clients 12, application server 14, database server 16, analyzer component 18, and web server 24) may each include one or more computers at one or more locations and may share data storage, communications, or other resources according to particular needs. For example, functionality described in connection with clients 12, application server 14, database server 16, analyzer component 18, and web server 24 may be provided using a single computer system, which in a particular embodiment might include a conventional desktop or laptop computer. Furthermore, functionality described in connection with clients 12, application server 14, database server 16, analyzer component 18, and web server 24 may be provided using any suitable software components. Each computer system may include one or more suitable input devices, output devices, mass storage media, processors, memory, or other components for receiving, processing, storing, and communicating information according to the operation of system 10.
